

# Priority 3, Resource Efficiency

*Matt Thompson & Nicole Skirde-Vural*

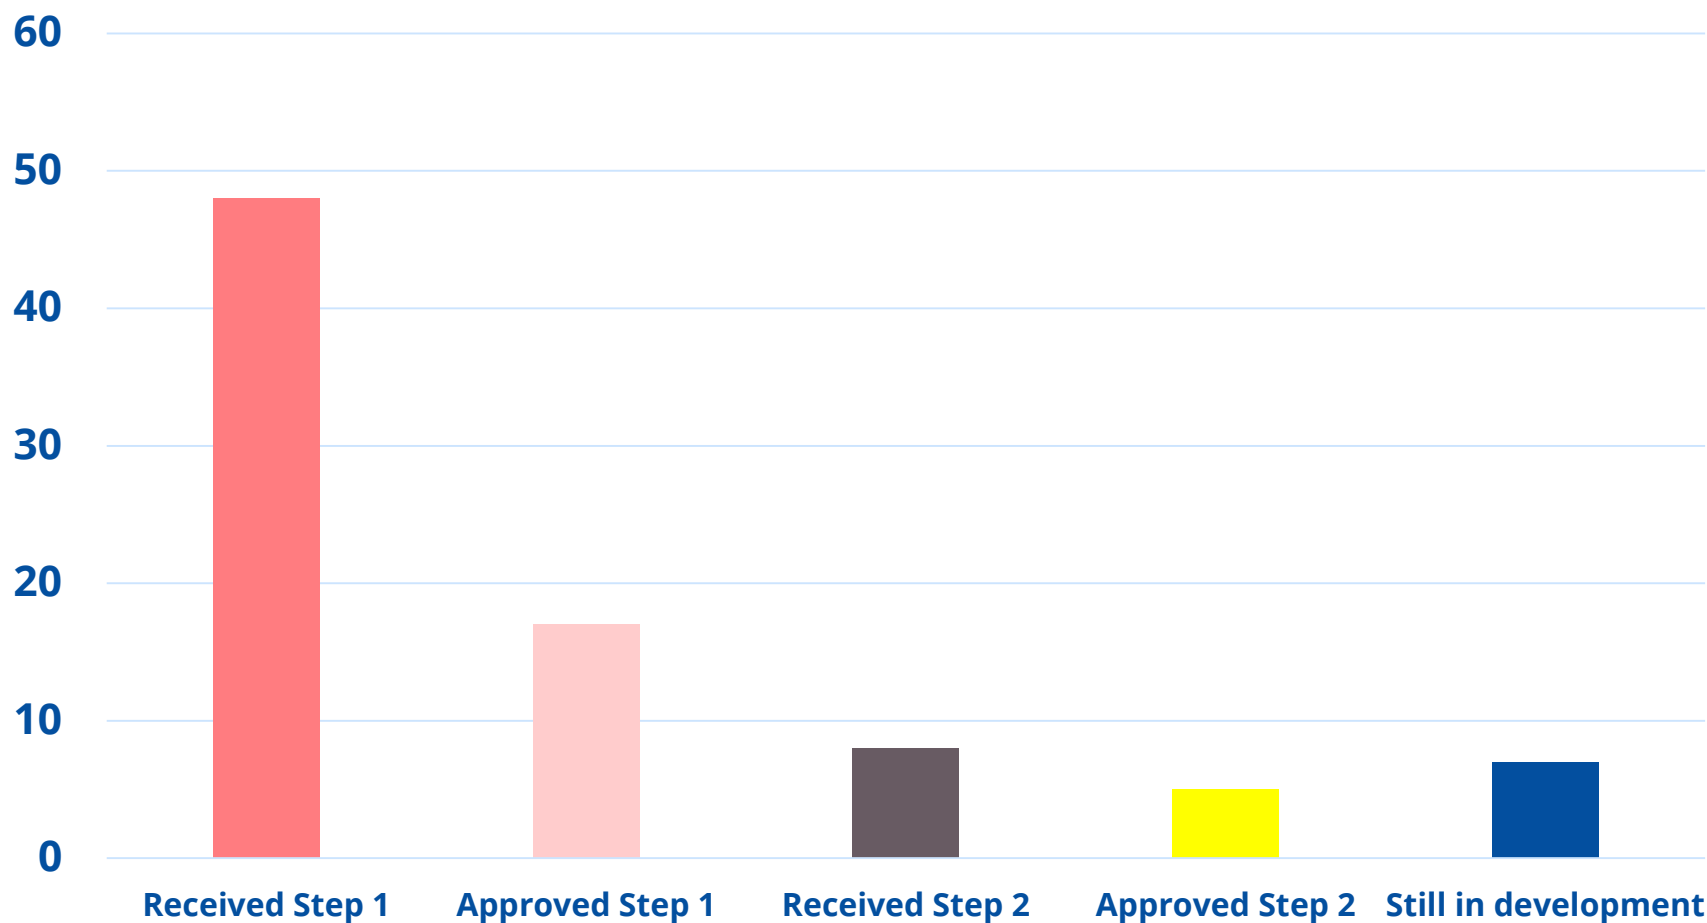

# Priority 3 Objective

“Optimise the use of material resources and reduce the use of natural resources”

*Programme Specific Objective SO5*

Success will be **measured** in terms of the use and uptake of eco-innovations in NWE, but also in terms of the resource savings and (waste) recycling rates they generate

# Priority 3 - Story so far

# Type of actions so far

**Increase** material recovery, reuse and recycling

- Innovative use of waste
- New products, processes, technologies

**Reduce** raw material use

- New, fully recyclable products

# Projects so far

Project	Focus
AFTB	Towards Adhesive Free Timber Buildings
Fibersort	Market demonstration and validation of Fibersort Technology
Food Heroes	Improving resource efficiency through designing innovative solutions to reduce food waste
PHOSforYOU	Phosphorus recovery from waste water
Re-Direct	Regional Development and integration of unused biomass wastes as resources for circular products and economic transformation

# Programme Indicators

## Programme **output indicators** for SO5

### **Common programme output indicator**

*Number of enterprises receiving support*

### **Programme specific output indicators**

*Indicators: solutions – decreased raw material use, increased recovery, reuse, recycling  
N.B. measurement units, target values!*

	<b>SUPERIOR Project</b>	<b>MEDIOCRE Project</b>
<b>Need</b>	Clearly defined. Relevant and justified.	Not defined. Too broad/narrow in scope.
<b>Rationale</b>	Major problems in the region well described. Brings relevant together key actors. Transnational justification.	Little transnationality or cooperation. Problem not clear. Partnership poorly defined.
<b>Objectives</b>	SMART. Achievable. Reflect identified need(s).	Objectives don't reflect need/results. Poorly constructed/ unrealistic.
<b>Results</b>	Linked to objectives and Overall priority. Clear baseline and expected change. Benefit of the project articulated.	Not justified. Outputs, not results. Impact not mentioned. Not linked to priority. Poor long term impact.

# General Advice

**Clear project focus**

**Answer the questions in the application**

**Its business unusual**

**Have an objective and relevant partnership**

**Transnational programme**

**Clear baseline**

# Q & A

# Intervention logic

## Step 1
