

DAMIEN DE RIBEROLLES

AGRILAND IS ONE OF THE WILLOW PLANTATION TRIAL SITES,
WHERE DIFFERENT SPECIES OF WILLOW ARE PLANTED

Damien is the Director General at Agriland

What will Agriland do?

- Agriland will work on WPI in conjunction with Ireland and Wales to grow various genus of willow under varying conditions.
- The grown willow bark will be analysed and comparative analysis completed in parallel to the the Irish and Welsh producers.
- Agriland will also promote the development of willow growing throughout its network through 1 to 1 meetings with farmers/growers and active workshops.
- Additional work will involve the active promotion of willow planting and the integration of zero waste biorefineries in the north of France/Germany and Brussels.
