Interactive online seminars on biomarker validation topics - IBBL

IBBL provides detailed insights within various fields of biomarker topics such as regarding the importance of pre-analytics in biomarker discovery, the advantages of Biomarker Validation or sharing insights on concrete use cases. These insights will be provided within the format of an interactive online seminar tailored to the needs of interested SMEs.

What you get

Meet expert in the field

Insights on biomarker validation topics

Up to max. € 3.000

How it works

Interested SMEs will have to register for these online seminars and have the opportunity to provide information regarding their needs by answering a short questionnaire, as well as choosing between different provided appointments (where the seminars will be held) during the registration process. The SMEs will receive detailed information about date, time and title of the online seminar. The number of participants will be limited to max. 10 attendants.

Examples of topics:

- Importance of pre-analytics in biomarker discovery
- The advantages of Biomarker Validation
- Sharing insights on concrete use cases
